

Building a Big Bridge

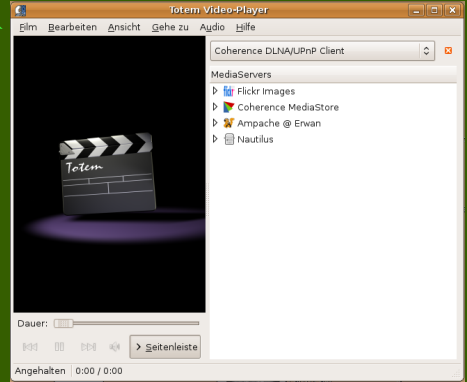

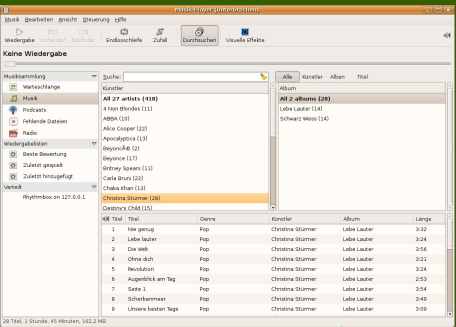

Coherence

DLNA/UPnP framework

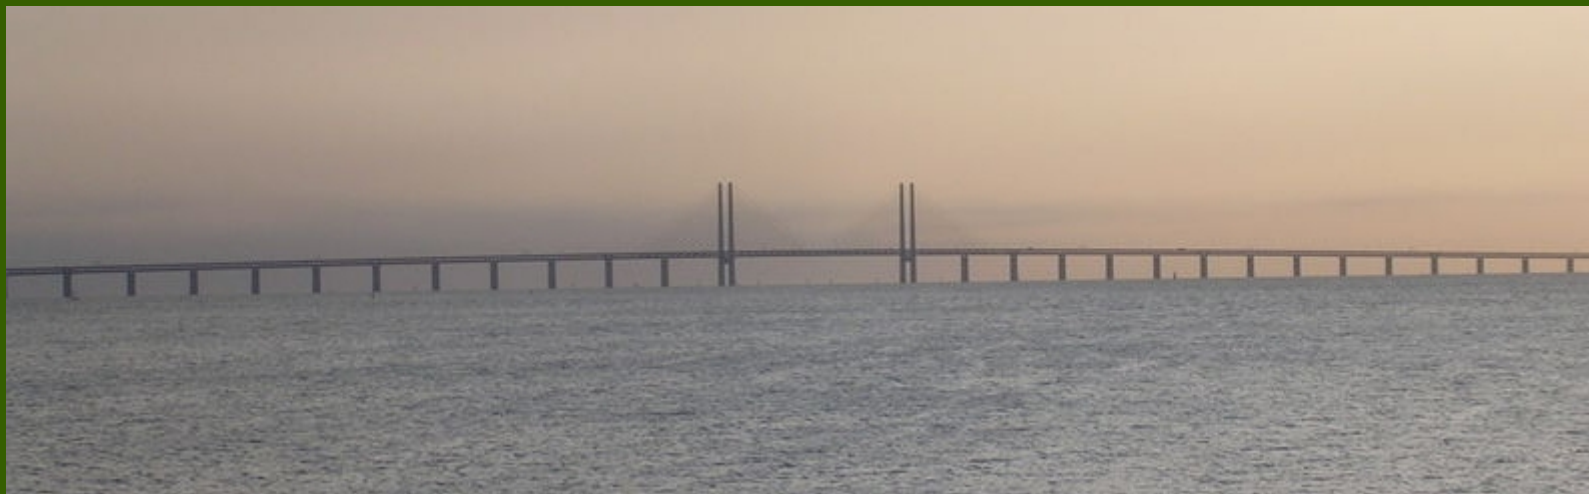

DLNA OS Summit 2008

November 8, 2008 - Philippe Normand & Frank Scholz

The rest?

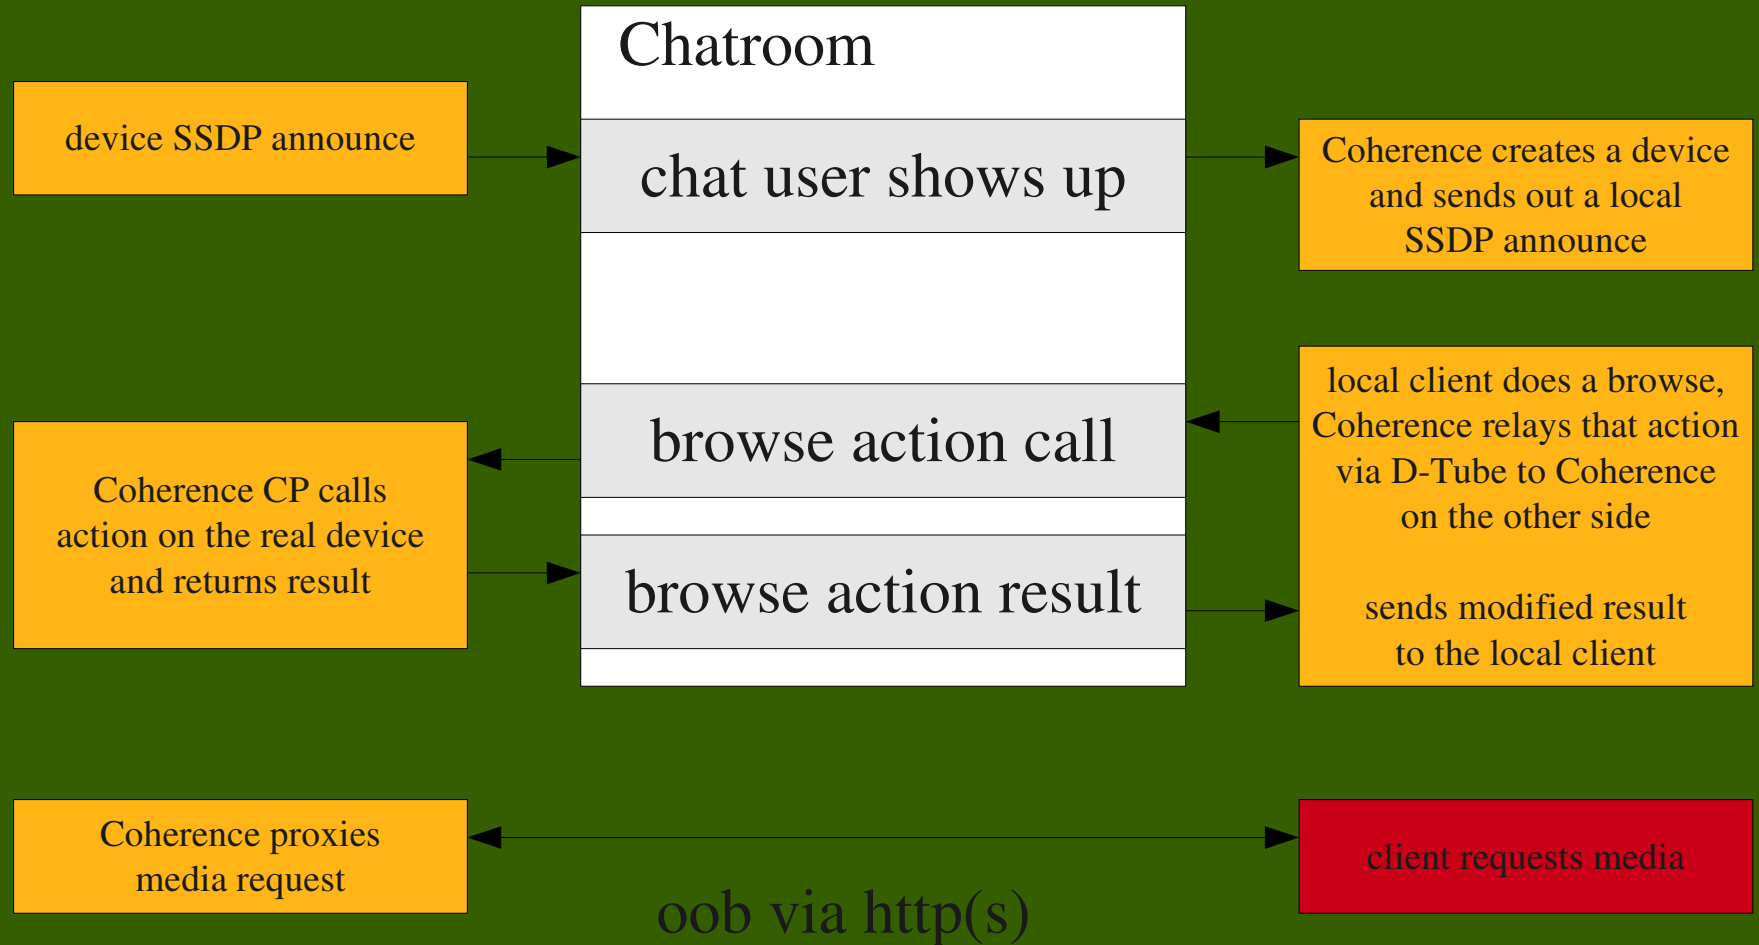

?

- D-Tubes from the Collabora Telepathy framework
- Map Dbus objects into Jabber MUCs
- Coherence on one side has already these these objects
- Coherence on the other side reacts upon these appearances in the chat-room and can dynamically expose them as local UPnP devices

The Concept

- Thank **YOU!**
